## Our Goal

Our team worked with the Bloomington Council for Community Accessibility to help improve websites for many local restaurants, retail stores, and other local businesses. The goal of this is to make web navigation easier for all users, particularly for those with cognitive, visual, or hearing disabilities.

## What we looked for

To achieve our goal, we had to examine many aspects of web accesibility. We did this by completing surveys set up by our client with specific goals in mind. Some of the things we looked for relate to color contrast, keyboard navigation, carousel/rolodex accessibility, content structure, alt text on images and videos, and other general web accesibility practices. We utilized tools such as WAVE (Web Accessibility Evaluation Tools) and Axe Dev Tools (Web Accessibility Testing Tool). Below, we can show how these tools work for one of the businesses we worked on as a team throughout the semester, Daves Hot Chicken:

### WAVE
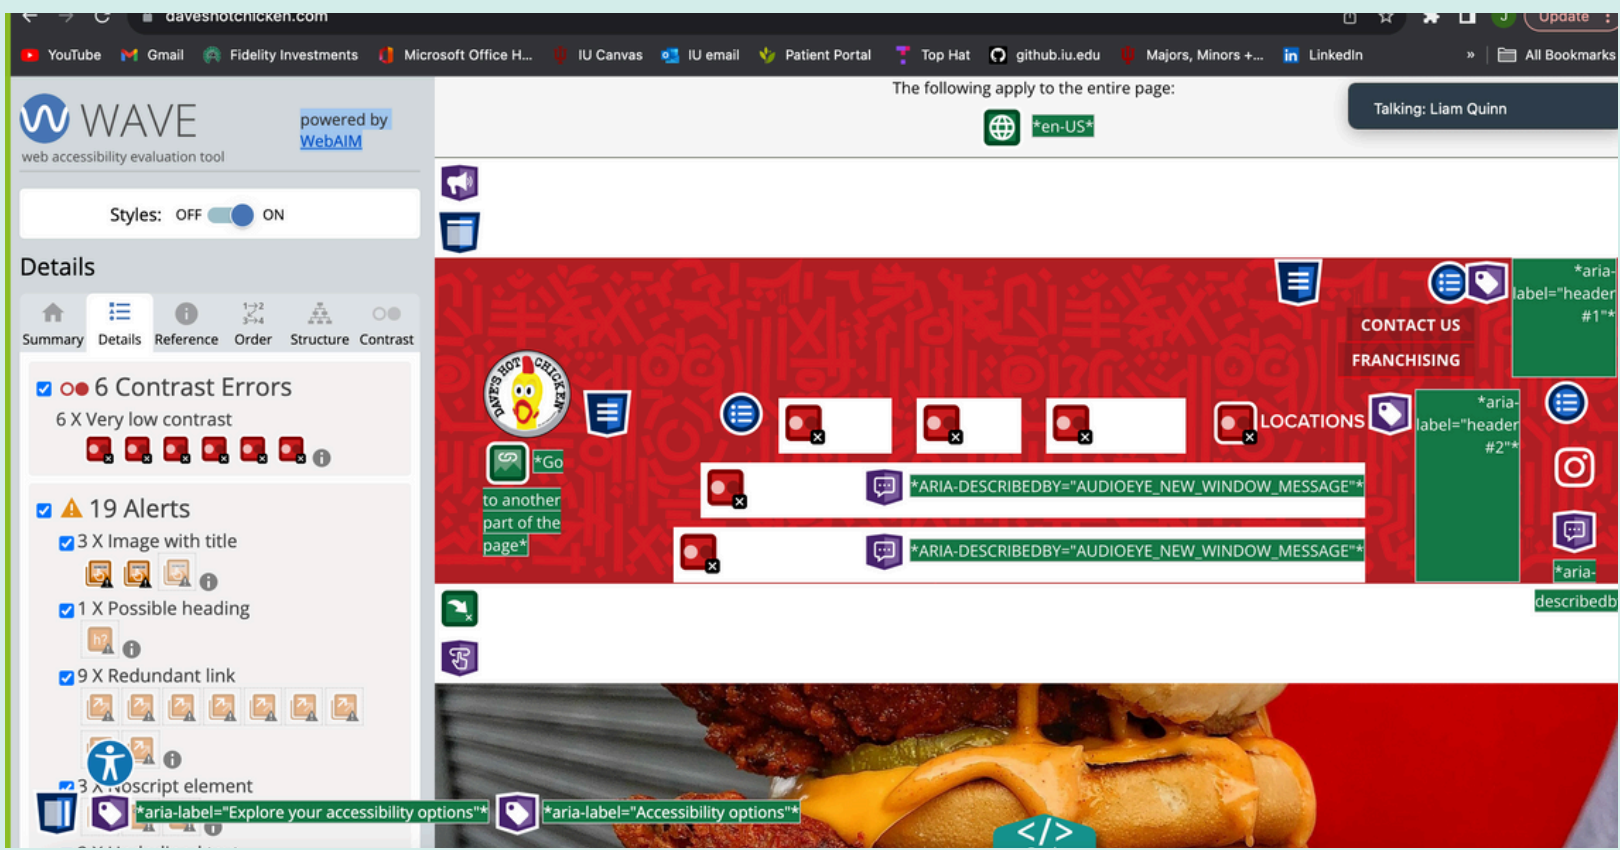

### Axe Dev Tools

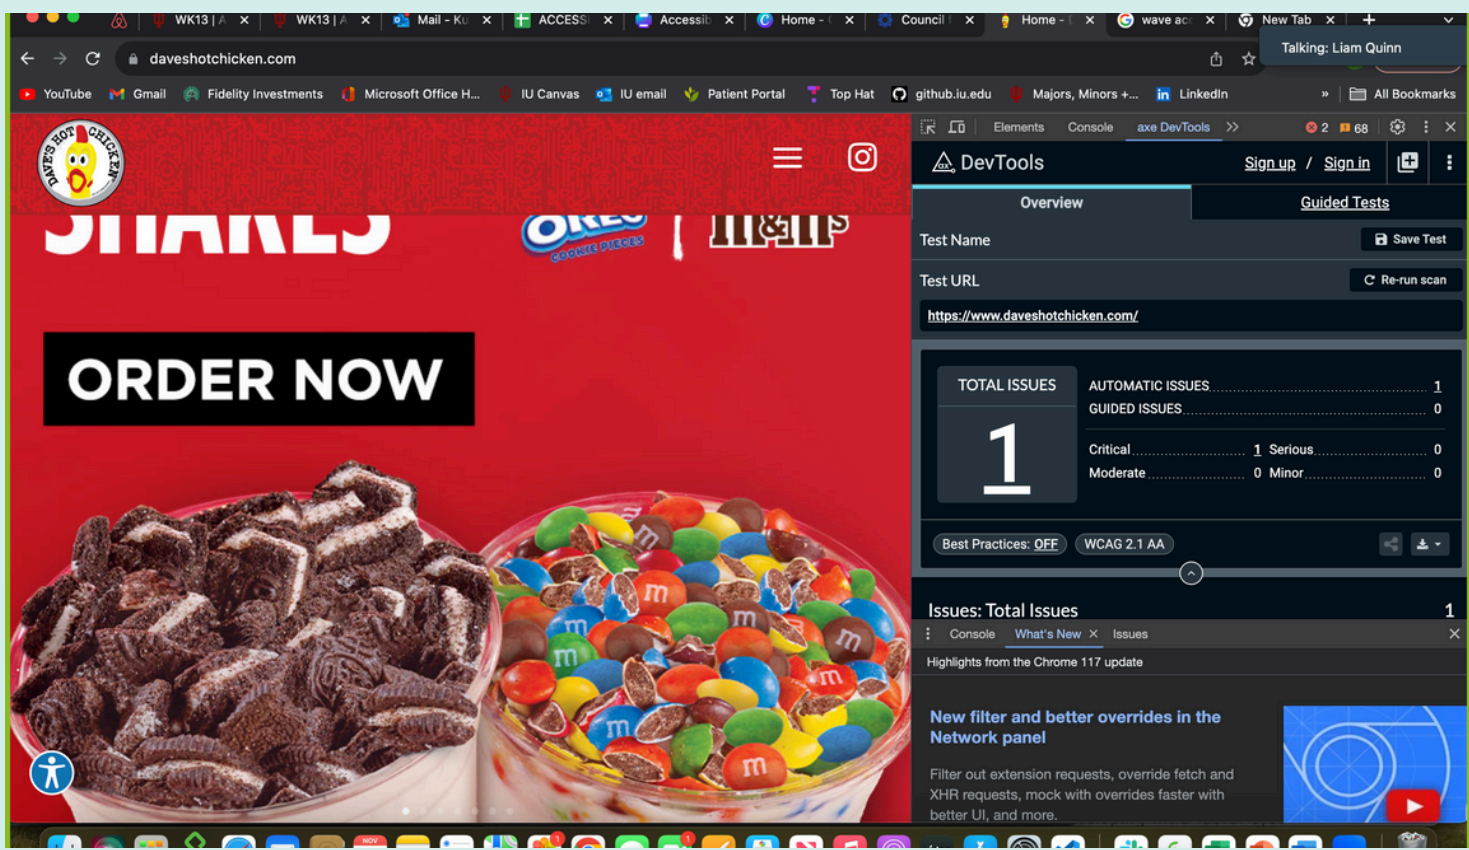

## Businesses We Helped

Daves Hot Chicken

Hoosier Workwear Outlet

Malibu Grill

Monroe County Public Library

Mr. Hibachi

Old National Bank

O'child Children's Boutique

PetSmart

Kohl's

Serous Float

Sophia the Week Being Studio

All Starbucks location

The Village Pub

Think geek

ULT

Yankee candle

**Feel free to check our these websites and see if you notice any areas that lack basic accessibility!**
